

## Kemet Lapping Training course

The **NEW** Flat Lapping Technical Centre is equipped with 10 Kemet Flat Lapping and Polishing Machines (15", 24", 36" diameter) along with the latest Mitutoyo Surface Measuring, Flatness Inspection Equipment and ultrasonic machines.

The programme lasts for a maximum of 2 days and will cover the following:-

1. The reasons for lapping and polishing.
2. Methods of lapping and polishing.
3. Setting up and operating of Lapping Machines.
4. Flatness control.
5. Workholding methods.
6. Cleaning and inspection of your Mechanical Seals.
7. Surface finish and flatness measurement.

At the end of the Programme a Certificate will be issued confirming completion of the training, along with full supporting reference literature.

Please note that smaller groups (3-4 people) are more beneficial as this is a very hands on course.

It would be helpful if small components could be brought to the Course for lapping & polishing, or perhaps shipped in advance.
